

Did you know that every snowflake is different? Throughout his life, Wilson “Snowflake” Bentley took pictures of more than 500 snowflakes, and no two were exactly alike. Color in this outline of one of the snowflakes that Wilson Bentley photographed. Real snowflakes are white, but use your imagination and choose any colors!

When they are very small, snowflakes seem to be perfectly symmetrical. But if you look closely, they actually have small imperfections. Wilson “Snowflake” Bentley took pictures of more than 5000 snowflakes throughout his life. This outline of one of the snowflakes he photographed shows some imperfections in the snow crystal. These flaws make each snowflake unique! Real snowflakes are white, but use your imagination and choose any colors to color this one in!
